OBJECTIVE

Result-oriented Frontend Engineer and BIS top graduate (Ranked 1st, GPA 3.9/4.0) with a strong foundation in **Clean Code principles and Maintainable Architecture**. Experienced in building scalable web applications using React.js and Next.js, with a focus on creating **Reusable Components** and optimizing performance.

EDUCATION

10/2025 – Present	English Diploma in Business Information Systems (Postgraduate) , <i>Helwan University – Zamalek Campus</i>  • Core Focus: Python Programming, System Analysis, and IT Integration. • Key Competencies: Scientific research, teamwork-based projects, and professional presentations. • Schedule: One-year intensive program conducted in English.	Zamalek
2021 – 2025	B.Sc. in Business Information Systems , <i>Higher Technological Institute</i> • Honors: Excellent with Honors (GPA: 3.9/4.0) – Ranked 1st in Department. • Graduation Project: ITQAN Corporate Training Platform (MERN Stack). • Role: Team Lead & Full-Stack Developer. • Tech Stack: MongoDB, Express.js, React, Node.js, Figma. • Key Contributions: • Led a team of developers to deliver a comprehensive corporate training solution using Agile methodologies. • Conducted regular code reviews and strictly ensured front-end engineering standards and best practices within the team. • Designed intuitive, user-centric interfaces (UI/UX) in Figma, focusing on seamless navigation. • Developed and integrated RESTful services with a responsive React frontend, ensuring optimized performance.	Tenth of Ramadan City, Egypt

EXPERIENCE

05/2026 – Present	Front End Developer , <i>DUWIC (Full Time)</i>  Developed interactive and responsive user interfaces using React.js and Tailwind CSS with a focus on clean, high-performance code. Managed tasks and workflow via Jira in close collaboration with the development team, while applying best practices for file structure organization and writing reusable, maintainable code.	Remote, Cairo
06/2024 – 10/2024	Frontend Engineer , <i>Masar Altmaioz - التميز مسار (Project Based)</i>  • Project: Track Medical System  • Engineered a comprehensive medical management system, implementing advanced Role-Based Access Control (RBAC) and secure Protected Routes . • Developed high-performance, responsive web pages and reusable components using React.js . • Integrated the frontend with RESTful APIs using Axios to ensure seamless data flow and dynamic content. • Implemented secure user authentication with Firebase (OTP) and integrated interactive maps using React Leaflet . • Collaborated in an Agile environment using Git/GitHub and ClickUp	Remote, السعودية
02/2024 – 05/2024	Frontend Developer , <i>DR Hany Dentist Clinic System (Freelance)</i>  • Designed and implemented key UI components for a dental clinic system using HTML, CSS, and React.js . • Focused on creating a user-friendly experience and ensuring cross-browser compatibility .	

INTERSHIPS

08/2023 – 09/2023	Front-end Web Development Summer Training at information Technological Institute (ITI) Skills: HTML - CSS - Bootstrap - JavaScript - OPP In JavaScript - ES6 - Node.js - AngularReact.js
-------------------	---

PROJECTS

FurniStyle  , E-commerce Furniture Web App (Next.js & Redux Toolkit)

Live Demo  | **Source Code** 

- **Workflow & Team Synergy:** Managed the full development lifecycle using **ClickUp** for task tracking and milestone management, ensuring a structured and timely feature delivery.
- **Professional Git Flow:** Implemented a robust version control strategy by architecting the core **file structure** on a dedicated feature/file-structure branch, followed by systematic **Refactoring**, **Pull Requests**, and seamless merging.
- **Advanced Tech Stack:** Developed a high-performance platform using **Next.js** for SEO optimization and fast page loading, with a modern UI built via **Tailwind CSS** and **shadcn/ui**.
- **Hybrid State Management:** Designed a scalable state architecture by leveraging **Redux Toolkit** for complex global data and **Zustand** for lightweight, high-performance UI state handling.
- **System Integration:** Integrated **RESTful APIs** via **Axios** for real-time inventory synchronization and secure catalog management.

My Time [🔗](#), *Personal Task Management & Productivity SaaS (MERN Stack)*
Live Demo [🔗](#)

- **Strategic Product Vision:** Engineered a **SaaS platform** that optimizes productivity by analyzing user fatigue levels to provide personalized task recommendations.
- **Intelligent Algorithms:** Developed dynamic logic to categorize and suggest tasks based on real-time energy levels and difficulty.
- **User-Centric UI/UX:** Architected a high-fidelity **Figma** interface featuring intuitive dashboards for fatigue tracking and task visualization.
- **Full-Stack Engineering:** Built a scalable solution using **React/Next.js**, integrated with **Node.js**, **MongoDB**, and **Firebase** for secure Auth.
- **Scalable State Management:** Leveraged **Redux** for real-time synchronization of fatigue metrics and task data for **40+ active users**.

E Learning App [🔗](#), *Interactive Course Management Platform (React.js)*
Live Demo [🔗](#) | Source Code [🔗](#)

- **Stateful Data Fetching:** Engineered a robust data synchronization layer using **React Query** for efficient course management and real-time enrollment tracking.
- **System Integration:** Spearheaded the seamless integration of frontend components with a **.NET API**, ensuring secure and reliable data flow.
- **UI/UX Implementation:** Translated high-fidelity designs into responsive, user-centric interfaces using **Material UI**, prioritizing intuitive navigation for both students and instructors.
- **Scalable Architecture:** Developed reusable components to handle complex functionalities such as advanced course search and dynamic profile management.
- **Network Optimization:** Leveraged **Axios** for streamlined API communication, implementing best practices for error handling and performance.

Brain Game [🔗](#), *Interactive Puzzle Mobile App (React Native & Expo Router)*
Source Code [🔗](#)

- **Professional Git Flow:** Managed lifecycle via **feature/onboarding** branch with a systematic strategy for version stability.
- **Modular Architecture:** Designed a **file-based routing** system with Expo Router for clean separation of game and logic modules.
- **User Experience (FTUE):** Built a high-fidelity **Onboarding flow** with persistent state handling via **AsyncStorage**.
- **Advanced Stack:** Implemented responsive UI with **Tailwind CSS (NativeWind)** and optimized performance using **React Compiler**.
- **Multimedia Integration:** Integrated **Expo-Audio** and **SVG assets** for interactive sensory feedback and smooth gameplay.

SKILLS

- **Languages:** JavaScript (ES6+), **TypeScript**, HTML5, CSS3.
- **Frameworks & Libraries:** **React.js**, Next.js, **React Native (Foundations & Mobile UI Components)**, Redux Toolkit, Zustand, Tailwind CSS, shadcn/ui, Material UI, Bootstrap.
- **Tools & Technologies:** Git & GitHub, RESTful APIs (Axios), Firebase (Authentication), Figma (UI/UX Design), **Unit Testing (Learning)**.
- **Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), **Clean Code Principles (SOLID)**, **Maintainable Architecture**, **Reusable Components Design**, and Responsive Web Design.
